Technology Features

Lacquer ware: Adopted the imported particles material and extruded in a whole piece by steel mold machinery at 250 degrees high temperature and high pressure, capable of reaching anti-impact force of grade 14.
The shape is standard and quite stable within the tolerance of 0.5;
Finishing: Adopted water-based environmental protection paint and complied with the VOC international standards;
Hardware accessories: With antioxidant treatment, the surface will not oxidize, change color or fade;
Waterproofing: Lacquer products have the feature of waterproof and moisture-proof, suitable for bathroom and other humid environment;

Constant Temperature Automatic Painting and dust-free Automatic-painting Workshop

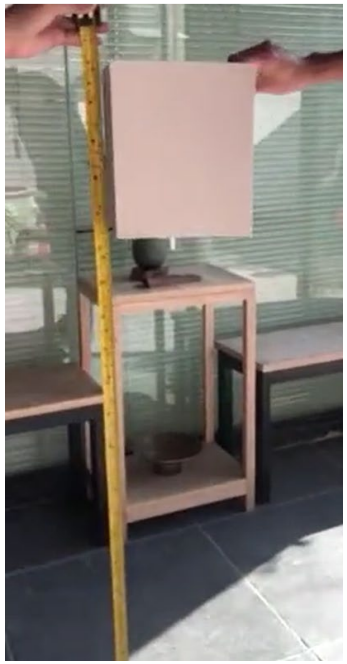

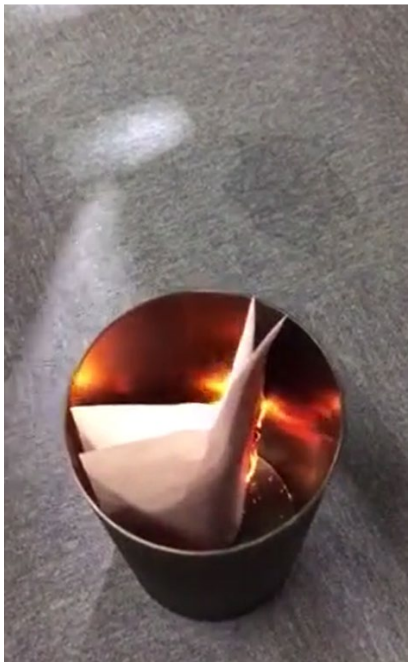

The products have passed a number of SGS international tests.
